

Create a rabbit... hide a rabbit!

Challenge

Create a drawing of a rabbit using this clever 'optical illusion' technique.

Check out how to do it [here](#).

Make sure you follow these **top tips**:

- make the lines outside the image **very** straight (use a ruler or edge of a book)
- make the lines inside the image curved – all going in the same direction.

Resources

Paper, felt tip/crayon, ruler or other straight edge

Extra

- What other shapes can you use this technique with?
- What happens if you use 2 different colours for your lines? 3 colours? 4 colours?
- What happens if you make the curved lines deeper curves/flatter curves?
- Can you explain why it is called an optical illusion?
- Take a picture of your picture and ask an adult to upload it to the q1e twitter page
