## 1A – Model report

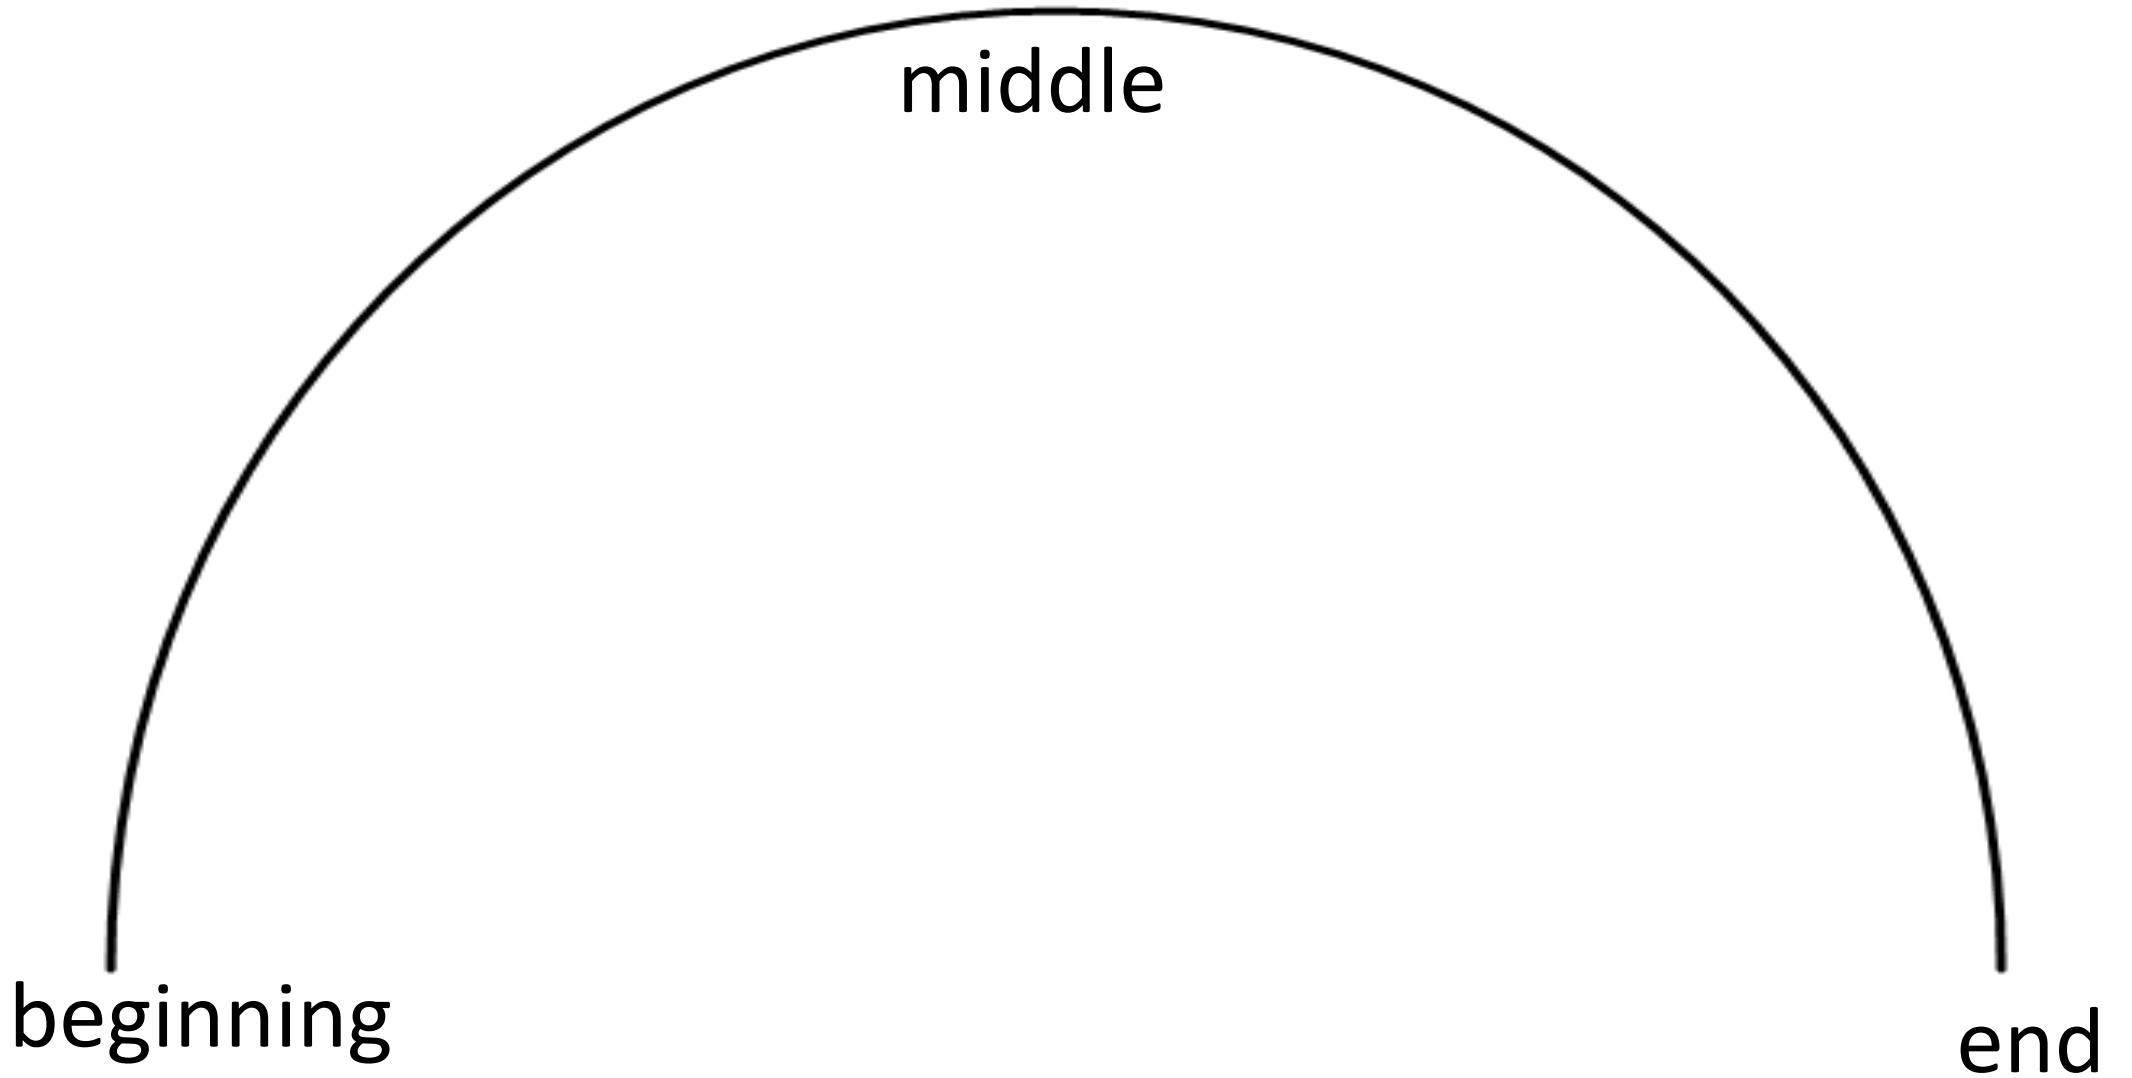

### Example

Fred went to the cold snowy Arctic. He saw a fluffy polar bear and her cubs. The polar bear and her cubs have been under the ground for 4 months. They drink milk from their mother which is yummy!

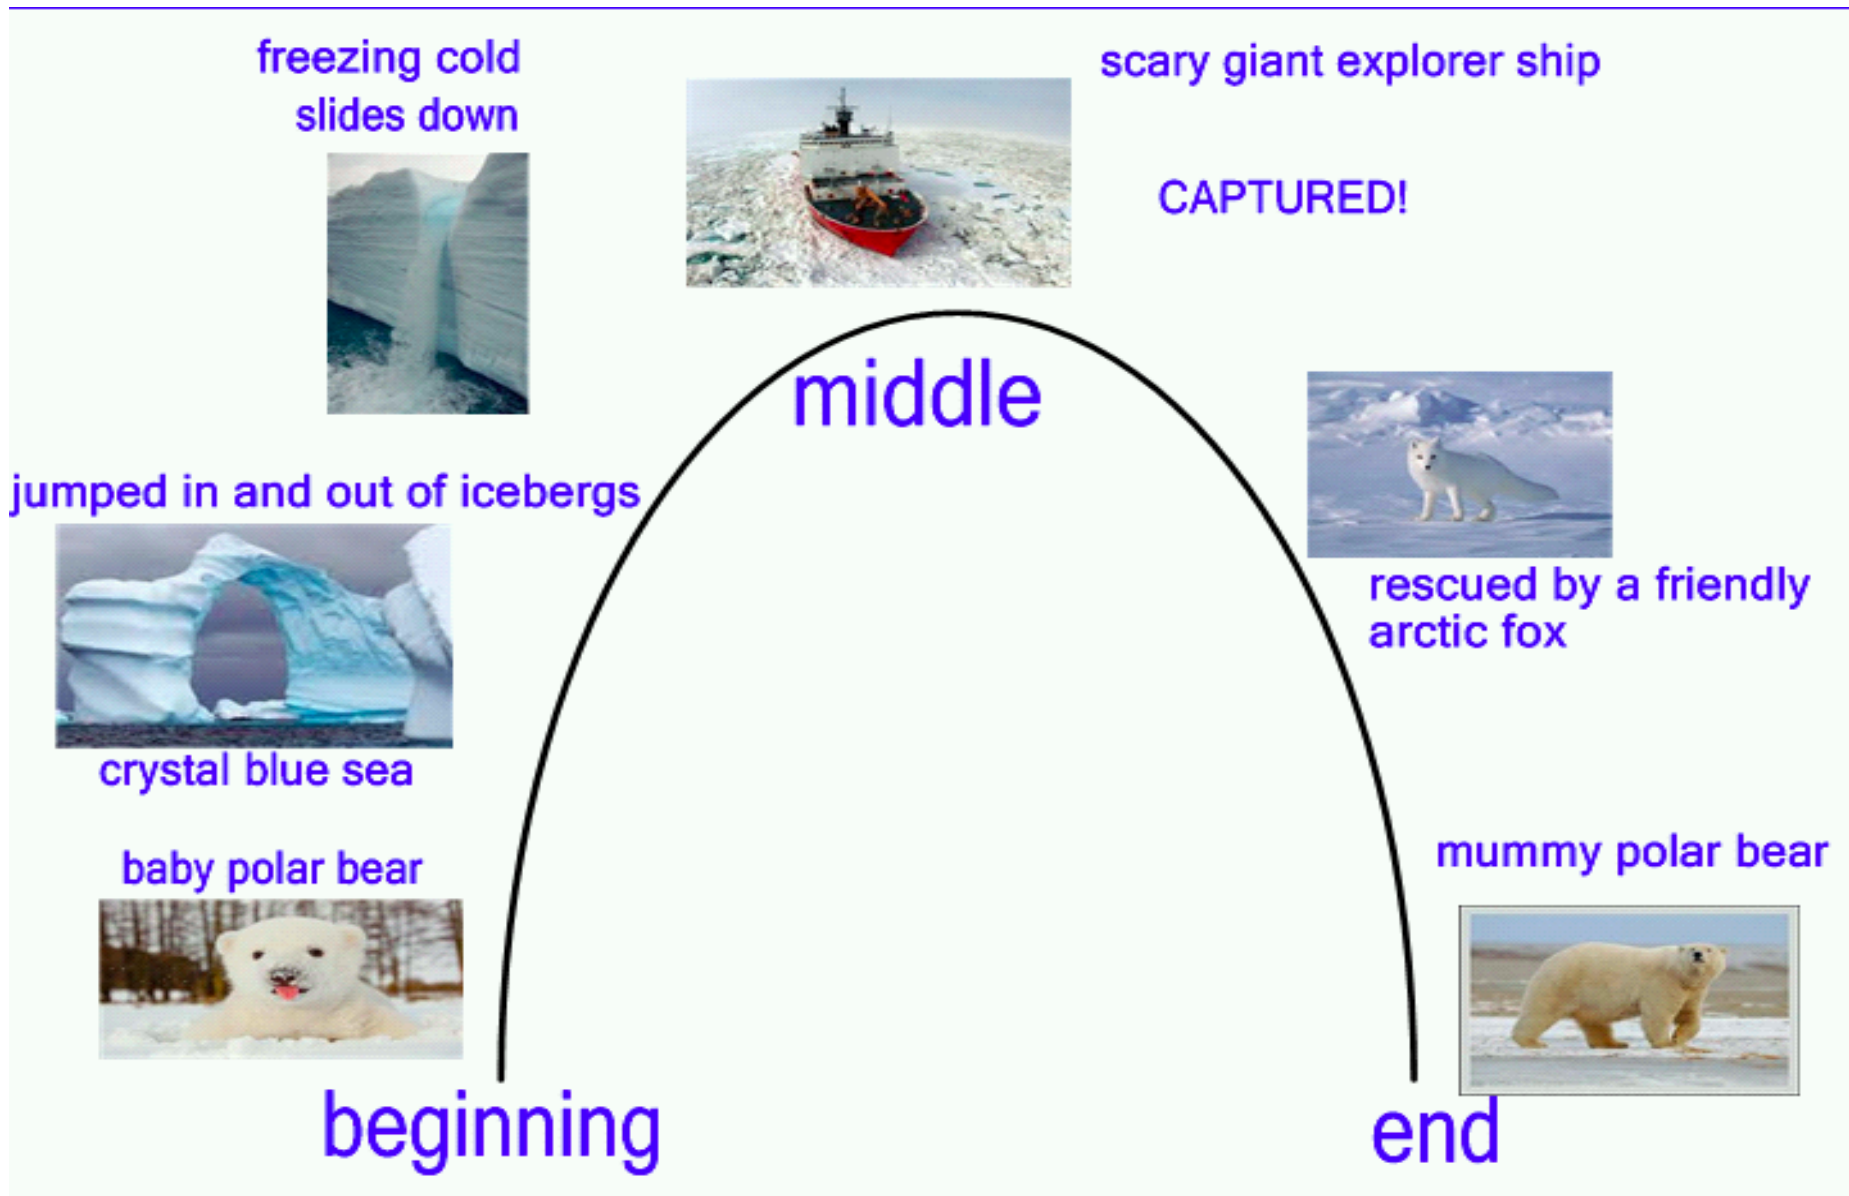

### Challenge

Fred went to the icy cold Arctic and saw a wonderful thing. He saw a fluffy polar bear with fur as white as snow and her little cubs. They had been under the ground for four months and the cubs saw light for the first time. The polar bears feeds milk to her cubs to make help them to grow.

2A – Plan template

2B- model plan

### **3A – Model story**

#### Example

A baby polar bear lives in the arctic. He lives with his mother. One day he went on an adventure. He wanted to find some more friends. He jumped into the icy water and saw....

#### Challenge

In the freezing Arctic there lived a baby polar bear and his mother. He wanted to go on an adventure to find some more friends. The baby polar bear slides down the freezing cold iceberg and jumps into the icy blue water. Gliding through the crystal blue sea he saw.....

### 3B – Story language word bank

In the freezing Arctic

In the distance

Slippery, snowy slope

After hours of

Suddenly... CRACK!

Unfortunately

As quick as a flash

because and but

## 4A – Polar bear picture

## **4B – Model questions**

How long do you live?

What do you eat?

Why is your fur white?

When do you sleep?

Where.....?

## **5A – Model facts**

Animal : polar Bear

- They have white fur.
- They are higher up the food chain than we are.
- They are the largest carnivore (meat eater) that lives on land.
- They eat seals as the main part of their diet.
- They have 42 teeth
- Male polar bears can weigh up to 680kg.

**Fun fact:** Did you know their skin is black!
