

Cook

Yum yum... can you make an Edible Dirt Pot?

Challenge

Follow this to make an Oreo carrot dirt pot... yes you can really eat it?

Food skills you will know how to:

- Measure
- Weigh
- Divide
- Sieve
- Mix

Ingredients

- Strawberries (washed and dried)
- A pack of Oreo biscuits
- 100 grams of icing sugar
- A few drops of orange food colouring
- Empty recycled fruit or yogurt pots

Method

Add food colouring to the icing sugar. Dip the strawberries in the icing sugar and set aside to cool. Simply remove the cream centers from 12 Oreo cookies. Then place the chocolate cookies in a Ziploc bag and crush them completely with a rolling pin. Spoon the Oreo "dirt" into each pudding cup, and then place one of the strawberry "carrots" in the cup. Finish them off by spooning additional Oreo dirt around the carrot to make it appear as though it's planted in the ground.
